JANUARY

EDITORIAL

Theodore Peters, Jr. 5

ARTICLES

Direct Potentiometric Determination of Sodium Ion in Blood. I. Potentiometric Response in Simple Sodium Chloride Solutions

Peter Bijster and Kees L.J. Vink 6

Rapid Loss of Lactate Dehydrogenase Isoenzyme Activity in Serum by Cold-Induced Formation of Immunoglobulin G-Lactate Dehydrogenase Complex

Gary G. Wickus and Martin J. Smith 11

Sampling from a Skewed Population Distribution As Exemplified by Estimation of the Creatine Kinase Upper Reference Limit

W. Greg Miller, Vernon M. Chinchilli, Hanns-Dieter Gruemer, and Walter E. Nance 18

Kinetics of Enzymatic O-Methylation: Its Value in Assays for Catecholamines in Plasma

Licister Mason and Cyril Weinkove 24

Effect of Sample Dilution on Measurements of Free (Unbound) Hormones

Dietrich Geiseler and Michael Ritter 28

Results of a Nationwide Survey of Analyses for Creatine Kinase and Creatine Kinase Isoenzymes

D. Joe Boone, Patricia H. Duncan, Mary Louise MacNeil, Barnett F. Smith, Barbara Houston, and Thomas L. Hearn 33

A Two-Site Immunoradiometric Assay with Magnetizable Particles: Human Liver Ferritin as a Model

Abdul latif Al-Shawi, Anne Dawnay, and John Landon 38

Myoglobin Concentration, Creatine Kinase Activity, and Creatine Kinase B Subunit Concentrations in Serum during Thyroid Disease

I. Docherty, J.S. Harrop, K.R. Hine, M.R. Hopton, H.L. Matthews, and C.J. Taylor 42

Clinical Significance and Partial Biochemical Characterization of Lactate Dehydrogenase Isoenzyme 6

Catherine H. Ketchum, C. Andrew Robinson, Leo M. Hall, William E. Grizzle, Noel K. MacIaren, William J. Riley, and Craig Trost 46

Transient Creatine Kinase-BB Activity in Serum or Plasma after Cardiac or Respiratory Arrest

Thomas H. Massey and Mikell R. Goe 50

Simultaneous Determination of 25-Hydroxy- and 1,25-Dihydroxyvitamin D from a Single Sample by Dual-Cartridge Extraction

Pai C. Kao and Don W. Heser 56

Amylase from Human Serous Ovarian Tumors: Purification and Characterization

Jack J. Zakowski, Martha R. Gregory, and David E. Bruns 62

On the Interpretation of Serial Laboratory Measurements in Acute Myocardial Infarction

Adelin Albert, Eugene K. Harris, Jean-Paul Chapelle, Camille Heusghem, and Henri E. Kulbertus 69

Determination of Enteroglucagon in Plasma for Detection of Celiac Disease in Children

Anders F. Kilander, Lars Stenhammar, Göran Lindstedt, and Per-Arne Lundberg 77

Differences in Radioimmunoassay Results for Thyroglobulin That Affect Management of Patients with Thyroid Cancer

Monika F. Bayer and I. Ross McDougall 81

Use of Monoclonal Antibodies in an Enzyme Immunoassay for Factor VIII-Related Antigen

Linda A. Bradley, Eduardo L. Franco, and Howard M. Reisner 87

Development of a Reference Material for Alkaline Phosphatase

Patricia H. Duncan, Sarah S. McKneally, Mary Louise MacNeil, Douglas M. Fast, and David D. Bayse 93

Noncompetitive Enzyme-Linked Immunoassay for Apolipoprotein B in Serum

C. Fievet, M. Koffigan, D. Ouvry, S. Marcovina, Y. Moschetto, and J.C. Fruchart 98

Stabilities of Some Constituents of Marmoset (*Callithrix jacchus*) Plasma under Various Conditions of Storage

Colin W. Davy, Michael R. Jackson, and John M. Walker 101

PROPOSED SELECTED METHOD

Antiepileptic Agents—Primidone, Phenobarbital, Phenytoin, and Carbamazepine by Reversed-Phase Liquid Chromatography

Benjamin Gerson, Frances Bell, and Sum Chau 105

SCIENTIFIC NOTES

Two Commercial Methods Evaluated for Eliminating the Labile Fraction from the Assay for Glycated Hemoglobin (Glycohemoglobin)

David M. Nathan, Barbara S. Dunn, and Thomas B. Francis 109

Pyruvate Kinase Isoenzymes in Human Serum

Julie-Lani Ngo, Kirk N. Garratt, Pamela Eversole, Robert A. Orlando, and Kenneth H. Ibsen 111

Freeze/Thaw Stability of Transferrin, and Reference Values Obtained with Kinetic Nephelometry

L. Stoddard, W. Dennis, R.M. Parvin, and O.W. van Assendelft 114

Sex-Dependent Relation between Ionized Calcium in Serum and Blood Pressure

Niels Fogh-Andersen, Lisbeth Hede-gaard, Jørgen Thode, and Ole Siggaard-Andersen 116

A Rapid Method for Repurifying Partly Degraded Radiolabeled Steroids

M.J. Jawad, Emery A. Wilson, and Michael W. Vernon 118

Salivary Estriol Concentrations during Normal Pregnancies, and a Comparison with Plasma Estriol

J.J. Evans, A.R. Wilkinson, and D.R. Aickin 120

An Improved Micro-Scale Liquid-Chromatographic Assay for Piperacillin in Plasma and Urine

Donald Jung and Narendra K. Mahajan 122

A Screening Method for Biotinidase Deficiency in Newborns

Gregory S. Heard, Julie R. Secor McVoy, and Barry Wolf 125

Comparison of the Du Pont aca and Dow Methods for Determination of High-Density Lipoprotein Cholesterol

Nadja N. Rehak, Ronald J. Elin, Ruth Chesler, and Ernestine Johnson 127

Liquid and Lyophilized Quality-Control Materials Compared for Use in Continuous-Flow Analysis

Ronald J. Elin and Betty A. Gray 129

Simplified Determination of Serotonin in Plasma by Liquid Chromatography with Electrochemical Detection

Philip C. Tagari, David J. Boullin, and Cledwyn L. Davies 131

Simultaneous On-Line Measurement of Blood K^+ , Ca^{2+} , Na^+ , and pH with a Four-Function ChemFET Integrated-Circuit Sensor

A. Sibbald, A.K. Covington, and R.F. Carter 135

Clinical Usefulness of Estriol Assay for Predicting "Light-for-Dates" Infants

J.J. Evans, A.R. Wilkinson, and D.R. Aickin 138

Improved Liquid-Chromatographic Determination of 3-Methoxy-4-hydroxyphenylethylene-glycol in Urine with Electrochemical Detection

James R. Shipe, John Savory, and Michael R. Wills 140

Influence of Substrate Concentration on the Activation of Transketolase, Aspartate Amino-transferase, and Glutathione Reductase by Coenzymes

J.C.M. Hafkenscheid and C.M.C.E. van Dijk 143

Long-Term Retrospective Control Procedures for Monitoring Analytical Performance of Laboratory Instruments

Maria Luisa Gozzo, Giuliano Barbaresi, Giuseppe Giocoli, Bruno Zappacosta, and Cecilia Zuppi 149

Enzyme-Linked Immunosorbent Assay of Retinol-Binding Protein in Serum and Urine

S. Lucertini, P. Valcavi, A. Mutti, and I. Franchini 149

Anti-Triiodothyronine Autoantibodies Interfere with Two Recently Commercialized Radioimmunoassays for Free Triiodothyronine

J. Rodriguez-Espinosa, J. Ordóñez-Llanos, J.A. Gómez-Gerique, and J. Mora 151

LETTERS

Storage of Breath Samples

D. Bentley, J. Blakesley, J. Spencer-Peet, and D.C.F. Wood 153
(Response)
K. Michael Parker, David L. Ring, and Theodore J. Pysher

Lactate Dehydrogenase Isoenzyme 6 with Increased Creatine Kinase BB Isoenzyme

Eileen Chape and Trevor Hyde 153

Immunochemical Assay of Lactate Dehydrogenase Isoenzyme 1

Egil Raabo and Steen H. Ingwersen 154

Determination of Ferrioxamine-Bound Iron in Urine

J.W.M.M. Arts and J.C.M. Hafkenscheid 155

Two Biological Sources of 3 α -Hydroxysteroid Dehydrogenase Used to Measure Total Bile Acids in Serum	Jonathan D. Berg, Harry I. Pandov, and Herbert G. Sammons	155
Three Chromatographic Methods Compared for Measurement of Hemoglobin A ₁ and A _{1c}	David J.F. Rowe and Frank C. Goodland	156
Butylmedil Concentrations in Blood and Viscera in a Case of Fatal Intoxication	Sotiris Athanaselis, Costas Maravelias, Manolis Michalodimitrakakis, and Antonios Koutselinis	157
Kinetic Glucose Dehydrogenase Method for Glucose Measurement with a Discrete Kinetic Analyzer Overcomes Interference by Ascorbate	Gerald A. Maguire and Christopher P. Price	157
Assay for Amitriptyline and Nortriptyline Facilitated by Use of "Toxi-Tubes" for Extraction	Garry F. Taylor, Thach Duong, and Norris G. Carter	158
Plasma Lipid and Lipoprotein Concentrations Are Normal in Congenital Hypothyroidism	Sital Moorjani, Jean-H. Dussault, Paul-J. Lupien, Claude Gagné, Daniel Brun, and François Szots	159
Acute-Phase Proteins in Acute Appendicitis	Frederick Van Lente, Robert S. Calen, and Anthony Marchand	160
Supplier Misidentified	Sheila G. Magil	160
Improved Liquid-Chromatographic Determination of 5-Hydroxyindoles	Francesc Artigas, Emili Martinez, José M. Tusell, Cristina Suñol, and Emilio Gelpí	160
Further Discussion of a Urine Specific Gravity Test Strip	Barry B. Kirschbaum	161
Increase in Serum Ferritin Concentration Induced by Fasting	Per-Arne Lundberg, Göran Lindstedt, Tina Andersson, Bo Branegård, Gunnel Lundquister, and Ernst Nyström	161
Single-Reagent Microcentrifugal Assay for Angiotensin Converting Enzyme in Serum	H.M. Neels, S.L. Scharpé, M.E. van Sande, and G.A. Fonteyne	163
What is the Correct Lecithin/Sphingomyelin Ratio for Human High-Density Lipoprotein?	D.O.E. Gebhardt (Response) Gerd Assmann	164
Effect of Short Pre-Incubation on Activation of Aspartate Aminotransferase by Pyridoxal 5-phosphate in Automated Procedures	Hendrik C. Barnard, Elsie M.S.P. Schoombie, and Gideon M. Potgieter	164
"Hyperprolactinemia" in Healthy Women	Göran Lindstedt, Per-Arne Lundberg, Calle Bengtsson, Ernst Nyström, Nils Bjurstam, Jan Leman, and Göran Rybo	165
Immunoprecipitation and Electrophoresis Used to Demonstrate and Evaluate Interference by CK-BB and Atypical-CK's with CK-MB Determinations by Immunoinhibition	C.A. Loshon, R.B. McComb, and G.N. Bowers, Jr.	167
Evaluation of Assayed Chemistry Control Pools for Measurement of High-Density Lipoprotein	Joan Benderson, G. Russell Warnick, and John J. Albers	168
Value of Measuring Free Triiodothyronine and Free Thyroxine in Serum in Detection of Hypothyroidism	R.J. Norman, R.K. Desai, W.M. Deppe, and S.M. Joubert	169
Delayed Activity of γ -Glutamyltransferase in a Patient with Cryoglobulinemia and the Hyper-viscosity Syndrome	E. Choo-Kang and H. Chan	170
Routine Screening for Prostatic Cancer by Assay of Serum Acid Phosphatase: A Modest Proposal	Patricia Cohen and Douglas Dix	171
Serum 1,5-Anhydroglucitol Concentration in Diabetic Patients Receiving a Continuous Subcutaneous Infusion of Insulin	Elja Pitkänen	171
Biliary Alkaline Phosphatase Isoenzyme in Diagnosis of Cholestasis	Angelo Burlina, Mario Plebani, and Paolo Rizzotti (Response) W.H. Siede and U.B. Seiffert	172
Immunofixation Cannot Replace Immunoelectrophoresis	J.M. Pekelharing and W.G. Haije	174
BOOK REVIEWS	Raymond E. Vanderlinde, R.L. Dryer, Samuel Natelson, Thomas A. Endler, Donald S. Young, John Savory, Jawed Fareed, George Bryson, A.W. Renuart, J. Stanton King, David N. Bailey, and P. Mushak	175

FEBRUARY

- Direct Solid-Phase Fluoroenzymeimmunoassay of 5 β -Pregnane-3 α ,20 α -diol-3 α -glucuronide in Urine** Haresh Shah, Anna-Majja Saranko, Matti Härkönen, and Herman Adlercreutz **185**
- Concentrations of Non-Glucose Polyols in Serum and Cerebrospinal Fluid from Apparently Healthy Adults and Children** Shigetake Yoshioka, Shizuko Saitoh, Shuji Seki, and Katsuyoshi Seki **188**
- A New Succinylcholine-Based Assay of Plasma Cholinesterase** Maxwell H. Abernethy, Peter M. George, and Vivienne E. Melton **192**
- Normal Reference Interval for Thyrotropin Response to Thyrotropin: Dependence on Age, Sex, Free Thyroxine Index, and Basal Concentrations of Thyrotropin** Eva M. Erfurth, Nils E. Nordén, Pavo Hedner, Anders Nilsson, and Lars Ek **196**
- Roche RIA and Abbott EIA Carcinoembryonic Antigen Assays Compared** Martin Fleisher, Jerome S. Nisselbaum, Lauren Loftin, Carol Smith, and Morton K. Schwartz **200**
- Continuous-Flow Determination of Primary Bile Acids, by Bioluminescence, with Use of Nylon-Immobilized Bacterial Enzymes** Aldo Roda, Stefano Girotti, Severino Ghini, Brunella Grigolo, Giacomo Carrea, and Roberto Bovara **206**
- Plasma Prolidase Activity: A Possible Index of Collagen Catabolism in Chronic Liver Disease** Isaac Myara, Anne Myara, Monique Mangeot, Monique Fabre, Christiane Charpentier, and Alain Lemonnier **211**
- Performance Characteristics and Diagnostic Value (vs Other Tests) of Two Radioimmunoassay Kits for Estimating Free Triiodothyronine in Serum** Timothy J. Wilke, Toni J. Sheedy, and David A. Hirning **216**
- A Family with a High Serum Aminopeptidase (Microsomal) Activity: Properties of the Enzyme from Serum of the Propositus** Kunio Hiwada, Mamiko Tokioka-Terao, Kazutaka Nishimura, and Tatsuo Kokubu **222**
- Quantitation of Lactate by a Kinetic Method with an Extended Range of Linearity and Low Dependence on Experimental Variables** Steven D. Hamilton and Harry L. Pardue **226**
- Liquid-Chromatographic Determination of Two Antidepressants, Trazodone and Mianserin, in Plasma** Steven H.Y. Wong, Steven W. Waugh, Maha Draz, and Nita Jain **230**
- Immunonephelometry of Apolipoprotein A-II in Plasma** M. Rosseneu, N. Vinaimont, T.A. Musliner, D. Bernier, P.N. Herbert, and F. Belpaire **234**
- Determination of Creatine Kinase MB Activity with the Du Pont aca: Interferences from the Sample Matrix** Wolfgang Stein and Jürgen Bohner **238**
- Reduction of Organic Mercury in Water, Urine, and Blood by Sodium Borohydride for Direct Determination of Total Mercury Content** Shlomo Margel and Joseph Hirsh **243**
- Enzyme-Linked Immunosorbent Microassay and Hemagglutination Compared for Detection of Thyroglobulin and Thyroid Microsomal Autoantibodies** Sheila H. Roman, Felice Korn, and Terry F. Davies **246**
- Metabolic Relationship between Urea and Guanidino Compounds as Studied by Automated Fluorimetry of Guanidino Compounds in Urine** Samuel Natelson **252**
- Rapid Radioimmunoassay for Corticotropin in Unextracted Human Plasma** Wendell E. Nicholson, Dirk R. Davis, Barbara J. Sherrell, and David N. Orth **259**
- Characterization of Apparent Lactate Dehydrogenase Isoenzyme 6: A Lactate-Independent Dehydrogenase** Stanley J. Podlasek, Richard A. McPherson, and Gregory A. Threatte **266**

SCIENTIFIC NOTES

- Methods for Extracting Phospholipids from Human Amniotic Fluid Compared** C.G. Duck-Chong, G.J. Baker, S.R. Murdoch, and R.M. Price **271**
- Determination of Inorganic Sulfate in Plasma with a Centrifugal Analyzer** P.J. Pascoe, M.J. Peake, and R.N. Walmsley **275**
- Improved Diagnosis of Classical vs Atypical Phenylketonuria by Liquid Chromatography** Yoichi Matsubara, James A. Heininger, and Yong Y. Lin **278**

An Evaluation of the Technicon RA-1000 Random-Access Analyzer	Irvin L. Bromberg, Alan Pollard, Jacqueline Cheng, and Alex Romaschin	281
Evaluation of a Direct Solid-Phase Radioimmunoassay for Progesterone, Useful for Monitoring Luteal Function	Norman P. Kubasik, Glenn D. Hallauer, and Robert G. Brodows	284
Dual-Channel Continuous-Flow System for Determination of Phenylalanine and Galactose: Application to Newborn Screening	Gary L. Hoffman, Ronald H. Laessig, David J. Hassemer, and Elizabeth R. Makowski	287
How to Improve Estimates of Imprecision	Jan S. Krouwer and Robin Rabinowitz	290
Enzymatic Determination of D-Mannose in Serum	Kokichi Soyama	293
Simple Method for Preparing and Quantifying Very-Low-Density Lipoprotein	M. Kohlmeier	295
Use of a Reference Standard to Improve the Accuracy and Precision of Seven Kits for Determination of Ferritin in Serum	Carmelo Iacobello, Salvatore Ghielmi, Silvana Belloli, Paolo Arosio, and Alberto Albertini	298
Liquid-Chromatographic Evaluation of Age-Related Changes in the Urinary Excretion of Free Catecholamines in Pediatric Patients	Thomas G. Rosano	301
Effect of pH and NaCl on Measurements of Ionized Calcium in Matrices of Serum and Human Albumin with a New Calcium-Selective Electrode	Selwyn J. Rehfeld, John Barkeley, and Hans F. Loken	304
Rapid Quantification of Pentobarbital in Serum by Fluorescence Polarization Immunoassay	Philip K. Li, Josephine T. Lee, and Rosanne M. Schreiber	307
Interconversion and Comparison of the Results of Three Methods for Cholinesterase in Serum	Mary A. Newman and Shane S. Que Hee	308
Effect of Contrast Media on Radioimmunoassay of β -Endorphin in Cerebrospinal Fluid	Victor S. Fang, Richard G. Fessler, Jacob R. Rachlin, and Frederick D. Brown	311
Adaptation of EMIT Reagents to the Cobas Bio Centrifugal Analyzer	Clive R. Hamlin and Patricia A. Sullivan	314
Sources of Error in Determinations of Carnitine and Acylcarnitine in Plasma	R.C. Fishlock, L.L. Bieber, and A.M. Snoswell	316
Improved Liquid-Chromatographic Determination of Mexiletine, an Antiarrhythmic Drug, in Plasma	Walter Mastropaolo, David R. Holmes, Michael J. Osborn, Julianne Rooke, and Thomas P. Moyer	319
CASE REPORTS		
Plasma Enzyme Activities in Primary Hypothyroidism	G.H. White and R.N. Walmsley	323
Hyponatremia: A Diagnostic Problem	R.N. Walmsley and G.H. White	326
OPINION		
A Comment on Thyrotropin Measurement and Evaluation	Joseph D. Musto, John M. Pizzolante, and Vincent P. Chesarone	329
LETTERS		
Amino Acid Assay in "High-Performance" Analyzers	D.E.C. Cole and L. Libadia	331
On the Stability of EMIT Assay Curves: Contradictory Observations	Eliseo V. Repique and Sergio J. Farber (Response) Jay E. Gorsky and Phillip R. Bach	331
Age-Related Reference Ranges for the Co-Optimized Alkaline Phosphatase Method as Used in the <i>aca III</i>	LuAnn Shank, Clair Jaberg, Vicki Chames, and Joseph L. Potter	332
Corticosteroid-Binding Globulin in Various Diseases	Hassen Zouaghi, Lia Savu, Aline Coulon, Emmanuel A. Nunez, Claude Guerot, Raymond Gryman, Rachid Amanou, and Abdel Miled	332
Determination of Adenylate Kinase Activity in Cerebrospinal Fluid	E.A.H. Hische, H.J. van der Helm, and H.I.G. Blanken	333
Extended Linearity of the Sigma Procedure for Ethanol Determination	E. Howard Taylor, Alexandros A. Pappas, and Richard H. Gadsden, Sr.	334
Choriogonadotropin: Now You See It—Now You Don't	J.C. Travis and P.B. Dewhurst	334
Enzymic Assay of Plasma Urate Involving Automated Colorimetry	Malcolm Rodger	335

Precision and Long-Term Stability of Newer Controls for Blood pH and Blood Gases	Jessie L. Hansen and Dorilyn J. Forleo	336
Rapid Measurement of Erythrocyte Osmotic Fragility	Y.S. Huang, K. Jenkins, M.S. Manku, and J. Davignon	336
Effect of Deproteinization on Determination of Serum Digoxin by Fluorescence Polarization Immunoassay	J.M. Scherrmann and R. Bourdorn (Response) Naresh Rawal, F.Y. Leung, and A.R. Henderson	337
Rapid Quantitative Isolation and Esterification of Urinary Porphyrins for Chromatographic Analysis	M. Muraca and W. Goossens	338
Anomalous Results on Using an Inhibitor Method for the Determination of Pancreatic Isoenzymes	Sharon Gordon, Graham Cooper, William Murray, Rosalind Campbell, and Simon Oakes	339
Radioimmunoassay Used to Monitor Therapy with Testosterone	Sujiva Ratnaike, David Campbell, and Max Goodwin	340
Lactate Dehydrogenase and Its Isoenzyme, LDH-1, in Serum Are Markers of Testicular Germ Cell Tumors	F.E. von Eyben	340
Response to a Criticism of the Du Pont CK-MB Test	William F. Naccarato	341
Gas-Chromatographic Procedure, with Pyrolytic Methylation of Serum Fatty Acids, in the Diagnosis of Refsum's Syndrome	A. Kumps and Y. Mardens	342
A Question of Rubella Immunity	John M. Pizzolante, Joseph D. Musto, and Vincent P. Chesarone	343
Renal Handling of Pancreatic Lipase	Jens Møller-Peterson and Francesco Dati	343
"Unbound Analog" Radioimmunoassays for Free Thyroxin (Amerlex Free Thyroxin) and the Effect of Albumin and Non-Thyroidal Illness	N.M. Deadman and D. Evans	344
BOOK REVIEWS	Vivian E. Shih and Thomas B. Clarkson	346
THE CLINICAL CHEMIST	J. Stanton King	348

MARCH

ARTICLES

Rapid Assessment of the Distribution of Apolipoproteins C-II and C-III Subspecies in Triglyceride-Rich Lipoproteins by Isoelectric Focusing	M.J. Bugugnani, M. Koffigan, I. Kora, D. Ouvre, V. Clavey, and J.C. Fruchart	349
Influence of Incomplete Cholesteryl Ester Hydrolysis on Enzymic Measurements of Cholesterol	Donald A. Wiebe and John T. Bernert, Jr.	352
Colorimetry of Hemoglobin in Plasma with 2,2'-Azino-di(3-ethylbenzthiazoline-6-sulfonic acid) (ABTS)	Miyuki Takayanagi and Tamotsu Yashiro	357
Differentiating Two Forms of Plasma Lipase by Use of Media with Different Ionic Strengths	P.L. Arzoglou, G. Férard, and P. Métais	360
Chemical and Clinical Evaluation of the Random Access Analyzer "RA-1000"	Morton K. Schwartz, Bernard E. Statland, Joan Coughlin, Carlotta Eisen, Martin Fleisher, Ralph Ito, Jacob B. Levine, Ronald Ng, Gina M. Pennachia, Herbert N. Rose, and Kathy Woolsey	364
Use of Monoclonal Antibodies in a Radioimmunoassay for Human Transcortin	Dirk Faict and Pieter De Moor	369
Multicomponent Analysis of Hemoglobin Derivatives with a Reversed-Optics Spectrophotometer	A. Zwart, Anneke Buursma, E.J. van Kampen, and W.G. Zijlstra	373
Changes in Sodium and Uric Acid Concentrations in Plasma during the Menstrual Cycle	Michael Mira, Peter M. Stewart, Val Gebiski, Derek Llewellyn-Jones, and Suzanne F. Abraham	380
Brain-Specific Proteins: Solid-Phase Immunobiotoluminescence Assay for Neuron-Specific Enolase in Human Plasma	K.-D. Gerbitz, J. Summer, and J. Thallemer	382

Development of an Agarose Gel Electrophoresis Technique for Determining α-Amylase Isoenzymes	Vicki L. Royse and Donald M. Jensen	387
Rapid Semiquantitative Measurement of Total Porphyrins in Urine and Feces by Magnetic Circular Dichroism	Kathryn M. Ivanetich, Colin Movsowitz, and Michael R. Moore	391
Progress Report on a National Quality-Control Survey of Triiodothyronine and Thyroxine Assay	G.C. Zucchelli, A. Pilo, M.R. Chiesa, and M.A. Piro	395
An International Comparison of Vitamin D Metabolite Measurements	Mat J.M. Jongen, Floris C. Van Ginkel, Wim J.F. van der Vijgh, Symen Kuiper, J. Coen Netelenbos, and Paul Lips	399
Reference Intervals for Serum Lipids, Lipoproteins, and Apoproteins in the Elderly	Concepcion Alvarez, Aurora Orejas, Sophia Gonzalez, Rosa Diaz, and Luis F. Colomo	404
Normal Reference-Intervals for 20 Biochemical Variables in Healthy Infants, Children, and Adolescents	Pilar Gómez, Carmen Coca, Carmela Vargas, Jesús Acebillo, and Alberto Martínez	407
Profile of Creatine Kinase Isoenzymes in Skeletal Muscles of Marathon Runners	Fred S. Apple, Marc A. Rogers, William M. Sherman, David L. Costill, Frederick C. Hagerman, and John L. Ivy	413
A Highly Sensitive Affinity-Column-Mediated Immunometric Assay, as Exemplified by Digoxin	J.W. Freytag, J.C. Dickinson, and S.Y. Tseng	417
Automated Kinetic Method for D-3-Hydroxybutyrate in Plasma or Serum	Cecil H. McMurray, W. John Blanchflower, and Desmond A. Rice	421
Use of High-Resolution Proton Nuclear Magnetic Resonance Spectroscopy for Rapid Multi-Component Analysis of Urine	John R. Bales, Denise P. Higham, Ian Howe, Jeremy K. Nicholson, and Peter J. Sadler	426
Determination of Sodium and Potassium with Ion-Selective Electrodes	Niels Fogh-Andersen, Peter D. Wimberley, Jørgen Thode, and Ole Siggaard-Andersen	433

SCIENTIFIC NOTES

A Thyrotropin Radioimmunoassay Kit Evaluated vs Two Reference Assays	S. Thomas Bigos, A. Eugene Pekary, Jerri MacLean, Charles E. Pierce, Allan W. Reed, and Jerome M. Hershman	437
Early Detection of Myocardial Infarction by an Immunoradiometric Procedure for Creatine Kinase MB	Richard F. Dods	439
Cell Membrane Abnormality Detected in Erythrocytes from Patients with Multiple Sclerosis by Partition in Two-Polymer Aqueous-Phase Systems	James M. Van Alstine and Donald E. Brooks	441
Direct Analysis for Urinary Protein with Biuret Reagent, with Use of Urine Ultrafiltrate Blanking: Comparison with a Manual Biuret Method Involving Trichloroacetic Acid Precipitation	John H. Eckfeldt, Marcia J. Kershaw, and Irven I. Dahl	443
Quantification of Nonenzymically Glycated Albumin and Total Serum Protein by Affinity Chromatography	Randall W. Yatscoff, Gerald J.M. Tevaarwerk, and J. Courtney MacDonald	446
Digoxin-Like Immunoreactivity in Normal Human Plasma and Urine, as Detected by a Solid-Phase Radioimmunoassay	Silvana Balzan, Aldo Clerico, Maria Grazia del Chicca, Umberto Montali, and Sergio Ghione	450
New Rapid Kit for Determining Calcium in Serum and Urine Evaluated	Joseph E. Zerwekh and Michael J. Nicar	452
Neutral Carrier Electrode for Continuous Measurement of Blood Ca^{2+} in the Extracorporeal Circulation	Peter Anker, Daniel Ammann, Peter C. Meier, and Wilhelm Simon	454
Tartrate-Resistant Acid Phosphatase in Serum of Cancer Patients	Kwok-Wai Lam, Charles Dannaher, Steve Letchford, Ted Eastlund, Chin-Yang Li, and Lung-T Yam	457
Some Factors Affecting Determination of Carotenoids in Serum	Micheline M. Mathews-Roth and Meir J. Stampfer	459
A Densitometer Based on a Microcomputer and TV Camera, for Use in the Clinical Laboratory	Russell P. Tracy and Donald S. Young	462
Effect of Use of Gel-Barrier Sampling Tubes on Determination of Some Antiepileptic Drugs in Serum	Yngve Bergqvist, Solveig Eckerbom, and Lars Funding	465
Collection and Handling of 24-Hour Urine Specimens for Measurement of Analytes Related to Renal Calculi	Ronald H. Ng, Mani Menon, and Jack H. Ladenson	467

Liquid-Chromatographic Determination of Eight Tri- and Tetracyclic Antidepressants and Their Major Active Metabolites	Tamara A. Sutfin, Robin D'Ambrosio, and William J. Jusko	471
Sodium Dodecyl Sulfate Polyacrylamide Gel Electrophoresis of Serum after Protein Denaturation in the Presence or Absence of 2-Mercaptoethanol	Thomas Marshall	475
Acetaldehyde-Hemoglobin Adducts: An Unreliable Marker of Alcohol Abuse	Fadia R. Homaidan, Larry J. Kricka, Penelope M.S. Clark, Stephen R. Jones, and Thomas P. Whitehead	480
Effects of Residual Liquid Junction Potential in Direct Potentiometry of Potassium	James W. Winkelman, Carey Merritt, W. James Scott, Anand Kumar, and George Baum	482
Glycated Hemoglobin in Uremic Patients as Measured by Affinity and Ion-Exchange Chromatography	Pierre Bannon, François Lessard, Raymond Lepage, Jean-Gil Joly, and Louis Dufresne	485

LETTERS

Serotonin Determined in Whole Blood by Liquid Chromatography with Electrochemical Detection	Esa R. Korpi	487
A Convenient Source of Creatine Kinase Isoenzyme BB	Sidney B. Rosalki	488
Amino-Terminal Propeptides of Type III Procollagen in Seminal Fluid	Axel M. Gressner and Hans-Hermann Neu	488
Increasing Precision of High-Density-Lipoprotein Cholesterol Determination in Serum	A.M. de Bruijn, F. Klein, C.M. van Gent, and H.A. van der Voort	490
Interpretation of Labeled-Analog Free Hormone Assay	Roger Ekins, Philip Edwards, Tom Jackson, and Dietrich Geiseler	491
Bilirubin Interferes with Uric Acid Determinations Involving Peroxidase-Mediated Reactions	Parvesh Masson and Ingemar Lindahl	493
Simplified Continuous-Flow Method for the Determination of Dialyzable Calcium	Andrew N. Fudge	493
A General Microcomputer Program for Enzyme Immunoassay Data Reduction	Michael S. Sealfon	494
More on Sex- and Age-Related Differences in Activity of Angiotensin-Covered Enzyme in Serum	Frode K. Rømer	495
Overestimation of Low Progesterone Concentrations by a Commercial Radioimmunoassay Kit	Wei Lin Allen, D.J. Back, and M.A. Shaw	495
A Letter Debated	Rudolph G. Mueller	496
Effect of Isolated Decreases in Albumin and Prealbumin on Radioimmunoassay Results for Free Thyroxine in Nonthyroidal Illnesses	J. Ordóñez-Llanos, J. Rodríguez-Espinosa, J.A. Gómez-Gerique, M.D. Solans-Barri, and M.A. Ruiz-Minguez	496
How to Increase SMAC I Productivity by at Least 15%	Ib Andersen	498
Electroimmunoassay of Prealbumin in Cerebrospinal Fluid	Peter Felding	498
Qualitative Analysis of Affinity-Chromatographed Glycated Hemoglobin Eluate by Electrophoresis on Citrate Agar	J.S. Krauss and M. Trinh	498
Serum Adenosine Deaminase Activity Is Increased in Sarcoidosis	Alan Taylor	499
Seven Ferritin Kits Compared with Respect to the "Hook" Effect	Guillermo Anido	500
Determination of Free Thyroxine and Triiodothyronine in "Subclinical" Hypothyroidism and Hyperthyroidism	H. Vierhapper, K. Derfler, P. Bratusch-Marrain, and W. Waldhäusl	500
Prevalence of Serum Autoantibody Binding of Ameriex Thyroxine Analog	A.M. Fielding	501
Du Pont aca Urinary Protein Method: No Blank Problems	Shahram Shahangian and K. Owen Ash	502
Thyrotropin as the Initial Screening Test for Thyroid Disease	Keith R. Allen and Derek Watson	502
Liquid Chromatography of Glycated Hemoglobins with the Daiichi HA-8110 Automated Analyzer	Eleftherios P. Diamandis, Graham Ellis, Denis Daneman, and Lynn C. Allen	503

- "Nonspecific" Increases in Plasma Immuno-
reactive Calcitonin in Healthy Individuals: Dis-
crimination from Medullary Thyroid Carcinoma
by a New Extraction Technique Jean-Jacques Body and Hunter Heath III 511
- Limits of Detection and Quantification, as Ap-
plied to an Assay for Digoxin Sumner M. Kalman, Dennis R. Clark, and 515
Lincoln E. Moses
- Mechanism of Platelet Interference with Mea-
surement of Lactate Dehydrogenase Activity in
Plasma M.J. Peake, Maria Pejakovic, 518
M.J. Alderman, L.A. Penberthy, and
R.N. Walmsley
- Changes in Fatty Acids in Phospholipids of the
Bronchoalveolar Fluid in Bacterial Pneumonia
and in Adult Respiratory Distress Syndrome Robert P. Baughman, Evan Stein, Joseph 521
MacGee, Mitchell Rashkin, and Hamid
Sahebjam
- Automated Prothrombin-Time Test with Use of
a Chromogenic Peptide Substrate and a Cen-
trifugal Analyzer Udo Becker, Helmut Jering, Knut Bartl, 524
and Franz Jilek
- Selenium and Other Elements in Human Mater-
nal and Umbilical Serum, as Determined Si-
multaneously by Proton-Induced X-Ray Emis-
sion Mervi Hyvönen-Dabek, Päivi Nikkinen- 529
Viikki, and Jan T. Dabek
- Enzymic Colorimetric Determination of Phos-
phatidylglycerol in Amniotic Fluid Joseph D. Artiss, Michael W. McGowan, 534
Donald R. Strandbergh, Emanuel
Epstein, and Bennie Zak
- Measurement of Choriogonadotropin by
Chemiluminescence Immunoassay and Im-
munochemiluminometric Assay: 1. Use of Iso-
luminol Derivatives G.J. Barnard, J.B. Kim, J.L. Brockelbank, 538
W.P. Collins, B. Gaier, and F. Kohen
- Simpler Liquid-Chromatographic Screening for
Organic Acid Disorders Michael J. Bennett and Clive E. Bradey 542

SCIENTIFIC NOTES

- Iodination of Thyroiberin by Use of Iodogen Stephen R. Butler, Robert W. Lam, and 547
Delbert A. Fisher
- Micromethod for Phosphonoformate Inhibition
Assay of Hepatitis B Viral DNA Polymerase Hsiang Ju Lin, Pui-Chee Wu, Ching-Lung 549
Lai, and Winnie Chak
- Effects of Storage Temperature and Time be-
fore Centrifugation on Ionized Calcium in
Blood Collected in Plain Vacutainer Tubes and
Silicone-Separator (SST) Tubes John Toffaletti, Nancy Blosser, and 553
Kathryn Kirvan
- Urea, Creatinine, and Glucose Determined in
Plasma and Whole Blood by a Differential pH
Technique M. Ripamonti, A. Mosca, E. Rovida, 556
M. Luzzana, L. Luzzi, F. Ceriotti, F. Cottini,
and L. Rossi-Bernardi
- Prevention of Interference by Dextran with Biu-
ret-Type Assay of Serum Proteins C.P. Flack and J.W. Woollen 559
- Interferences with Potentiometry of CO₂ in the
Ektachem 400 Analyzer Mark Steelman, Carl H. Smith, 562
Aravindaksha Menon, Bradley T. Thach,
Richard E. Hillman
- Values for Some Serum Analytes in High-Risk
Infants, Two Days Postpartum Edward J. Fitzsimons, Mary Ann Fletcher, 566
and Alan Chakrin
- Specific Affinity-Chromatographic Measure-
ment of Glycated Hemoglobins in Uremic Pa-
tients David E. Bruns, Peter I. Lobo, John 569
Savory, and Michael R. Wills

CASE REPORT

Inhibition of Cholesterol Oxidase in a Patient
with Cushing's Syndrome

Diane D. Davey, David B. Alber, Kenneth 572
W. Ryder, Joyce M. Jones, Mary L.
Hostetter, Wells R. Moorehead, and Tjien
O. Oei

CASE CONFERENCE

Serum Creatine Kinase MB Isoenzyme in
Chronic Muscle Disease

Albert A. Keshgegian and Nora V. 575
Feinberg

LETTERS

Diluent in the Technicon SMAC Assay for Iron
Modified to Avoid Serum Precipitation

Robert M. David and Z.K. Shihabi 579

Measurement of Free Thyroxin in Patients with Familial Dysalbuminemic Hyperthyroxinemia	Vipin D. Shah and Nila V. Shah	579
Creatine Kinase Activity in the Amniotic Fluid in Cases of Fetal Lung Immaturity	Nuriman Özgünes and Dilber Çetiner	579
How Best to Measure Serum Quinidine? A Case Report	Jay E. Gorsky and Carol J. Hanna	580
Multilayer-Film Bromoresol Green Method for Albumin Measurement Compared with Three Others	Gregory J. Buffone, Wilsa DeArmas, Vicki Frawley, Ching-Nan Ou, and Connie Schimbor	581
Determining Specific Gravity of Urine with Reagent Sticks	Friedrich C. Luft, George R. Aronoff, Naomi A. Walker, Rebecca S. Sloan, and Naomi S. Fineberg	582
Components of Biological Variation of Some Serum Analytes in Hospitalized Pregnant Women	Peter J. Pascoe, Colin S. Gallagher, and Callum G. Fraser	583
Bilirubin Interference with Uric Acid Assay in a Hycel: A Look at Azino Uric Acid	Don C. Davidson, Henry J. Garfield, and Fred Maney (Response) James M. Dodds	584
Comparison of a Logistic and a Mass-Action Curve for Radioimmunoassay	T.A. Wilkins	585
Incidence of "Flipped" Lactate Dehydrogenase Isoenzyme Pattern (LD ₁ > LD ₂) in Specimens with Normal Total Lactate Dehydrogenase from Coronary-Care Patients	Stephen H. Koopmeiners and J. David Turnbull	586
Phenacemide Interference with Jaffé-Type Determination of Creatinine in Three Automated-Analysis Systems	Martin H. Kroll, Linda Nealon, and Ronald J. Elin	586
Chemical and Atomic Absorption Methods for Thallium in Urine Compared	Nabil W. Wakid and Najwa K. Cortas	587
Digoxin-Like Immunoreactivity in the Serum of Neonates and Uremic Patients, as Measured in the Abbott TDX	Randal W. Yatscoff, Paul R.E. Desjardins, and James G. Dalton	588
Removal of Ammonia from Urine by Tetraphenylboron before Amino Acid Analysis	David C. Turnell and John D.H. Cooper	588
Comment on Thin-Layer Chromatography of Quinidine in Plasma	R.N. Gupta (Response) David N. Bailey and Michael J. Kelner	589
Together, Phenobarbital and Carbamazepine Lower the α_1 -Acid Glycoprotein Concentration in Plasma of Epileptic Patients	B. Bruguerolle, G. Jadot, and H. Bussiere	590
A Case of Falsely High Values for Serum Estradiol by "Direct" Assay	Leif Dibbelt and Erich Kuss	591
Comments on the Spectrophotometric Procedure for Angiotensin-Converting Enzyme	Ramon Stoner	592
Catecholamine Standards in Radioenzymic Assays	N.A. Schmidt	592
Above-Normal Concentrations of Lipid Peroxide in Serum of Patients with Gout	Y. Nishida, N. Kamatani, and T. Miyamoto	592
Comments on a Proposed Selected Method for Antiepileptic Agents	Lindy A. Conlan and Michael J. Staley	593
Evaluation of a New Test for <i>N</i> -Acetyl- β -D-Glucosaminidase in Urine	Edward H. Cooper and Mary A. Forbes	593
Interferences in the Direct Kinetic Determination of Acid Phosphatase Activity	C.W. Small and P. McNutt	594
Temperature Correction of Blood p_{O_2} Measurements	G.J. van Stekelenburg (Response) Edward R. Ashwood, Gerald Kost, and Margaret Kenny	595
Evaluation of a Reflectance Photometric Method for Determination of Urea in Blood, Plasma, or Serum	B.R. Hammond and E. Lester	596
Improvement of a Commercial EIA Kit for Determination of Serum β -Choriogonadotropin	A. Mailliavin, A. Beaudonnet, J. Pichot, and M.C. Revenant	597
Artifactual Peroxidase Activity in Animal Tissues	Grzegorz Bartosz	598

BOOK REVIEWS

Robert Rej, Theodore Peters, Jr., Richard Wistar, Jr., Robert F. Ritchie, Donald S. Young, and L. Edwards 599

AACC 36th National Meeting Brochure
(Following Page 16A)

EDITORIAL

- | | | |
|--|----------------------------------|-----|
| Laser Microprobe Mass Analysis and Aluminum Toxicity | John Savory and Michael R. Wills | 605 |
|--|----------------------------------|-----|

ARTICLES

- | | | |
|--|---|-----|
| REVIEW: Nuclear Magnetic Resonance (NMR) in Clinical Pathology: Current Trends | Charles Eric Brown, Joseph H. Battocletti, and LeRoy F. Johnson | 606 |
| Determination of Steroid Hormones in a Human-Serum Reference Material by Isotope Dilution—Mass Spectrometry: A Candidate Definitive Method for Cortisol | D.G. Patterson, M.B. Patterson, P.H. Culbreth, D.M. Fast, J.S. Holler, E.J. Sampson, and D.D. Bayse | 619 |
| Direct Spectrophotometry of Serum Hemoglobin: An Allen Correction Compared with a Three-Wavelength Polychromatic Analysis | Dennis A. Noe, Victor Weedn, and William R. Bell | 627 |
| Complexes of Serum Gamma-Glutamyltransferase with Apolipoproteins and Immunoglobulin A | Yves Artur, Maria Wellman-Bednawska, Alain Jacquier, and Gérard Slest | 631 |
| Theoretical Consideration of the Effects of Dilution on Estimates of Free Thyroid Hormones in Serum | Keita Kamikubo, Takashi Komaki, Shigenori Nakamura, Shigeki Sakata, Keigo Yasuda, and Kiyoshi Miura | 634 |
| Simultaneous Determination of Lidocaine and Its Principal Metabolites by Liquid Chromatography on Silica Gel, with Aqueous Eluent | Keiko Kushida, Kitaro Oka, Toshiyuki Suganuma, and Takashi Ishizaki | 637 |
| Apolipoprotein E Polymorphism and Hyperlipidemia | G. Assmann, G. Schmitz, H.-J. Menzel, and H. Schulte | 641 |
| Trace Elements in Serum from Pakistani Patients with Acute and Chronic Ischemic Heart Disease and Hypertension | Shah Nawaz Khan, M. Ataur Rahman, and Abdus Samad | 644 |
| Measurement of Prostate-Specific Antigen by Radioimmunoassay | Raymond J. Liedtke and John D. Batjer | 649 |
| Homogeneous Luminescence Immunoassay for Total Estrogens in Urine | Gianni Messeri, Anna Lucia Caladini, Gian Franco Bolelli, Mario Pazzagli, Antonella Tommasi, Pier Luigi Vannuchi, and Mario Serio | 653 |
| Improved Determination of Transketolase Activity in Erythrocytes | Tohoru Takeuchi, Kohsuke Nishino, and Yoshinori Itokawa | 658 |
| Carboxypeptidase-Catalyzed Hydrolysis of C-Terminal Lysine: Mechanism for in Vivo Production of Multiple Forms of Creatine Kinase in Plasma | M. Benjamin Perryman, John D. Knell, and Robert Roberts | 662 |
| A "Sandwich" Solid-Phase Enzyme Immunoassay for Lutropin in Urine | P. Rathnam and B.B. Saxena | 665 |
| Particle-Counting Immunoassay of Human Somatotropin | C.E. Castracane, C.L. Cambiaso, L.A. Retegui, I. Gilbert, J.M. Ketelslegers, and P.L. Masson | 672 |
| Glucocorticoids Directly Affect Spectrophotometry of Bilirubin in Amniotic Fluid | A. Milwidsky, S. Yagel, M. Chaouat, and M. Mayer | 677 |
| Interrelationships among Body Mass, Thyrotropin, Thyroid Hormones, and Thyroid-Hormone Binding Proteins in Healthy 70-Year-Old Men | Staffan Edén, Rudolf Jagenburg, Göran Lindstedt, Per-Arne Lundberg, and Dan Mellström | 681 |
| Total Polyamines and Their Non- α -Amino Acid Metabolites Simultaneously Determined in Urine by Capillary Gas Chromatography, with Nitrogen-Phosphorus Detector, and Some Clinical Applications | Frits A.J. Muskiet, Gita A. van den Berg, Anneke W. Kingma, Dineke C. Fremouw-Ottevangers, and M. Ruud Halie | 687 |

Inhibitor Binding Assay for Angiotensin-Converting Enzyme	Frej Fyhrquist, Ilkka Tikkanen, Carola Grönhagen-Riska, Lars Hortling, and Martin Hichens	696
Cytochrome <i>b₅</i> Reductase Activity in Erythrocytes and Leukocytes as Related to Sex and Age	Giorgio Panin, Monica Pernechele, Roberto Giurioli, Silvia Secchieri, Ornella Milanesi, Piero A. Pellegrino, and Lino Chiandetti	701
Transferability Studies for the AACC Reference Method and the IFCC Method for Measurement of Alkaline Phosphatase Activity	N.W. Tietz, A.D. Rinker, C. Burtis, P. Duncan, K. Ervin, L. Ewen, M. Hörder, M. Mathieu, C. Petitclerc, D. Grisley, L. Shaw, S.J. Smith, J. Strømme, and E. Zygowicz	704
Quantification of Pepsin A Activity in Canine and Rat Gastric Juice with the Chromogenic Substrate Azocol	P.C. Will, W.E. Allbee, C.G. Witt, R.J. Bertko, and T.S. Gaginella	707
Use and Significance of Reference Serum as a Secondary Standard for Electroimmunoassay of Apolipoprotein A-1	J.D. Fesmire, W.J. McConathy, and P. Alaupovic	712
Liquid Chromatographic Determination of Penbutolol and Its Principal Metabolites in Plasma and Urine	D.J. Miner, D.A. Binkley, and L.D. Bechtol	717
Are Reference Limits for Serum Creatine Kinase Valid in Detection of the Carrier State for Duchenne Muscular Dystrophy?	Hanns-Dieter Gruerner, W. Greg Miller, Vernon M. Chinchilli, Robert T. Leshner, Carol R. Hassler, Peter A. Blasco, Walter E. Nance, and Barbara Goldsmith	724
Activities of Some Enzymes in Serum after Therapy with Intracoronary Streptokinase in Acute Myocardial Infarction	Tai C. Kwong, Patricia G. Fitzpatrick, and Robert L. Rothbard	731
SCIENTIFIC NOTES		
Silver Staining of Unconcentrated Cerebrospinal Fluid in Agarose Gel (Panagel) Electrophoresis	Pankaj D. Mehta, Sangita P. Mehta, and Bruce A. Patrick	735
Removal of a Component Interfering with Phosphatidylglycerol Estimation in the "Helena" System for Amniotic Fluid Phospholipids	Thomas Spillman, David B. Cotton, Sherwood C. Lynn, Jr., and Jean-Pierre Bretauiere	737
Screening for Macroamylase in a Community Hospital	Charles A. Isham, Nathan A. Ridgeway, Regina Hedrick, and John C. Cate IV	741
Improved Assay of Unconjugated Estril in Maternal Serum of Plasma by Adsorption and Liquid Chromatography with Fluorimetric Detection	Franca Andreolini, Claudio Borra, Antonio Di Corcia, Aldo Laganà, Roberto Samperi, and Gianmarco Raponi	742
Electrothermal Atomic Absorption Determination of Aluminum in Tissues Dissolved in Tetramethyl Ammonium Hydroxide	Brian J. Stevens	745
Sensitive Non-Radioisotopic Method for Measuring Lipoprotein Lipase and Hepatic Triglyceride Lipase in Post-heparin Plasma	Shuichi Nozaki, Masaharu Kubo, Yuji Matsuzawa, and Seichiro Tarui	748
A Direct Comparison of Two Slope-Estimation Techniques Used in Method-Comparison Studies	Curtis A. Parvin	751
Relationship of Potassium and Magnesium Concentrations in Serum to Cardiac Arrhythmias	James C. Boyd, David E. Bruns, John P. DiMarco, N. Keith Sugg, and Michael R. Wills	754
Values of the U.S. National Reference Serum for Human Antibodies to Native DNA Obtained with Commercial Immunoassays for Anti-DNA in Systemic Lupus Erythematosus	Bernard H. Berne, Kathryn T. Galland, and Richard C. Welton	757
Discrepancies between Serum Free Triiodothyronine and Free Thyroxine as Measured by Equilibrium Dialysis and Analog Radioimmunoassay in Nonthyroidal Illnesses	K. Liewendahl, S. Tikanoja, T. Helenius, and M. Välimäki	760
Ultrastructural Localization of Aluminum in Patients with Dialysis-Associated Osteomalacia	Armand H. Verbueken, Frank L. Van de Vyver, René E. Van Grieken, Guy J. Paulus, Walter J. Visser, Patrick D'Haese, and Marc E. De Broe	763
Fluoroimmunoassays for Procainamide and <i>N</i> -Acetylprocainamide Compared with a Liquid-Chromatographic Method	Janis J. MacKichan, James D. Coyle, Brenda J. Shields, Harisios Boudoulas, and John J. Lima	768
Six Approaches to Routine Quantification of Human Monoclonal Immunoglobulin M Compared	Françoise Pontet, Jean-Louis Auget, and François Rousselet	774

Estimation of Free Thyroxin with a New Thyroxin Analog and a Porous-Glass Solid Phase	Lynn R. Witherspoon, Stanton E. Shuler, and Susan S. Gilbert	778
Anion-Exchange Chromatographic Determination of Bromide in Serum	Marvin E. Miller and Chris J. Cappon	781
Optimized Liquid-Chromatographic Determination of Metronidazole and Its Metabolites in Plasma	Robert A. Gibson, Lilliana Lattanzio, and Heiena McGee	784
Two Direct Radioimmunoassays for 17 β -Estradiol Evaluated for Use in Monitoring In Vitro Fertilization	Ray V. Haning, Jr., Sandra M. Meier, Lynn M. Boehnlein, Marybeth Gerrity, and Sander S. Shapiro	787
A New Approach to Photometry of Glycated Hemoglobin in Human Blood	Rolf Deeg, Urban Schmitt, Wolfgang Rollinger, and Joachim Ziegenhorn	790
Design of a Microcomputer-Based Densitometer System: Application to Serum Protein Electrophoresis	William E. Neeley	794
Semi-Automated Determination of the Uremic Toxin "b4-2"	Patrick Faguer, Nguyen-Khoa Man, Denise Pierrat, and Jean-Louis Funck-Brentano	797

CASE REPORTS

Atypical Alkaline Phosphatase Isoenzyme in Serum from a Patient with Hodgkin's Disease	J.P. Beilby, P. Garcia-Webb, C.I. Bhagat, and A. Prins	800
Increased Prostate-Type Acid Phosphatase Activity in Serum and Typical Bone Lesions Simulating the Presence of Prostatic Carcinoma	O. Peters, F. Gorus, M. De Boeck, M.F. Dehou, and B. Van Camp	803

LETTERS

Dialysis and Ultrafiltration Give Different Measures of Binding of Divalent Cations to Serum Proteins	José O. Alda, Jesús F. Escanero, and Andrés Pie	805
Improved Detection of Chylomicrons in Serum	U. Lippi, P. Cappelletti, and D. Signori	805
Photographic Monitoring of Enhanced Luminescent Immunoassays	Gary H.G. Thorpe, Thomas P. Whitehead, Rosanna Penn, and Larry J. Kricka	806
Calculation of Slope by Deming's Method from Least-Squares Regression Coefficients and Imprecision	R.B. Payne	807
γ -Glutamyltransferase in Normal Pregnancy	Ann Järnfelt-Samsioe, Göran Samsioe, Johan Waldenström, and Bo Eriksson	807
Comparison of the EMIT Phenytoin Procedure with Old and New Antibodies	Adrain C. McClellan, Kwok-Ming Chan, Donald A. Lichti, Victor N. Meltzer, and Jack H. Ladenson	808
Procedure for Discordant hCG Results	Robert O. Hussa	809
Heparinized "Microtainer" Tube Evaluated for Collection of Capillary Blood	Laura L. Norling, Carl H. Smith, and Michael Landt	810
Use of Magnetic Circular Dichroism in the Diagnosis of Porphyrria	Robert S. Day (Response) Kathryn M. Ivanetich, Colin Movsowitz, and Michael R. Moore	811
Nitrate Appears to Be the Urinary Component Inhibiting Oxalate Oxidase	K.L. Goldsack, R.F. A. Ginman, and J.M. Wright	813
Convenient Automated Method for Liquid-Chromatographic Measurement of Glycated Hemoglobin	David M. Nathan and Philip Raskin	813
Performance Characteristics of a Commercial Kit for Assay of Factor VIII-Related Antigen	Jan Cejka	814
Simultaneous Measurement of DOPA, DOPAC, and Catecholamines in Plasma by Liquid Chromatography with Electrochemical Detection	David S. Goldstein, Robin Stull, Reuven Zimlichman, Paul D. Levinson, Harold Smith, and Harry R. Keiser	815
Cyclosporin Concentrations in Whole Blood and Plasma	Michael J. Bennett, Kevin H. Carpenter, Eric Worthy, and John S. Lilleyman	817
Comparison of Two Colorimetric Assays for Angiotensin-Converting Enzyme Activity	P.L. Hurst and C.J. Lovell-Smith	817
Improved Simultaneous Liquid-Chromatographic Determination of Antiepileptic Drugs in Plasma	Ramon Soto-Otero and German Sierra-Marcuño	817
Visual Detection of Abnormal Hemoglobin with a Procedure for Glycated Hemoglobin	Campbell P. Howard, Nancy A. Reddig, and Karen Meek	818
Evaluation of a New Du Pont aca Test Pack for Theophylline	Robert V. Coyne, and David F. Walton	819

Low Values for Complement (C ₃) in Serum Can Be Used in Classifying Systemic Lupus Erythematosus	Peter Manu	820
BOOK REVIEWS	Wendell T. Caraway, Mario Werner, Robert J. Mohrbacher, Carl A. Burtis, and Bruce A. Kottke	821
THE CLINICAL CHEMIST	J. S. King	825

High-Density-Lipoprotein Cholesterol in Heparin-MnCl ₂ Supernates Determined with the Dow Enzymic Method after Precipitation of Mn ²⁺ with HCO ₃ ⁻	Paul S. Bachorik, Robert E. Walker, and Donna G. Virgil	839
A Specific Kinetic Assay for Tripeptide Aminopeptidase in Serum	Shinji Kanda, Kayoko Sudo, and Takashi Kanno	843
High-Resolution Densitometry: Analysis of Stained Albumin Bands as a Model for Electrophoresis of Serum Proteins	David J. Epstein and William E. Neeley	847
Liquid-Chromatographic Measurement of Amino Acids in Biological Samples after Formation of Phenylthiohydantoin Derivatives	H. G. Biggs and Laura J. Gentilecore	851
Electrophoretic Variants of Alanine Aminopeptidase, Alkaline Phosphatase, and γ -Glutamyltransferase in Urine	Klaus Jung and Utz W. Wischke	856
Automated Amidolytic Method for Determining Heparin, a Heparinoid, and a Low-M _r Heparin Fragment, Based on Their Anti-Xa Activity	Hugo ten Cate, Roy J. Lamping, Ch. Pieter Henny, Arie Prins, and Jan W. ten Cate	860
Direct Potentiometric Determination of Sodium Ion in Blood. II. Influence of Cations	Peter Bijster and Kees L. J. Vink	865
Simplified Determination of Carboxyhemoglobin	Ernest Beutler and Carol West	871

SCIENTIFIC NOTES

Suitability of Various Control Sera for Use in Testing the Accuracy of Cholesterol Determination with Enzymic Kits	Pierre N. Demacker, Geert J. M. Boerma, and Ad P. Jansen	875
Microscale Ultrafiltration Technique for Determining Free Drug in 50- μ L Serum Samples	Werner Wittfoht, Klaus Duwe, Wilhelm Kuhn, and Heinz Nau	878
A New Assay for Rheumatoid Factor	Ivar Giaever, Charles R. Keese, and Richard I. Rynes	880
Indophenol Method for Acetaminophen in Serum Examined	Pearl E. Novotny and Robert C. Elser	884
Evaluation of the EMIT Reagent System for Measurement of Caffeine with the EMIT Lab 5000 System and a Centrifugal Analyzer	Ching-Nan Ou, Vicki L. Frawley, and Janice M. Ellis	887
Protein-Enhanced Fluorescein Chemiluminescence Used in an Immunoassay for Rubella Antibody in Serum	Renée Shapiro, Joseph Chan, Ann Pierson, Karen Vaccaro, and James Quick	889
Semiautomated Analysis for Mercury in Whole Blood, Urine, and Hair by On-Stream Generation of Cold Vapor	F. Peter and G. Strunc	893
Effects of Azotemia on Results of the Boronate-Agarose Affinity and Ion-Exchange Methods for Glycated Hemoglobin	Mitchell G. Scott, Joseph W. Hoffmann, Victor N. Meltzer, Barry A. Siegfried, and Kwok-Ming Chan	896
Liquid-Chromatographic Determination of Indomethacin in Blood from Newborns with Patent Ductus Arteriosus	Ching-Nan Ou and Vicki L. Frawley	898

Automated Kinetic Determination of Angiotensin-Converting Enzyme in Serum	Aira Harjanne	901
Free Thyroxin Index and Direct Measurements of Free Thyroxin Compared for Evaluating Postpartum Autoimmune Thyroid Dysfunction	Rolf Jansson, Rosanne Forberg, and Klas Levin	903
Influences of Specimen Processing and Storage Conditions on Results for Plasma Ammonia	Joan H. Howanitz, Peter J. Howanitz, Carol A. Skrodzki, and Jo A. Iwanski	906
Simultaneous Determination of Penicillin and Cephalosporin Antibiotics in Serum by Gradient Liquid Chromatography	Thomas Annesley, Karen Wilkerson, Keith Matz, and Donald Giacherio	908
Enzymic Assay for Oxalate in Unprocessed Urine, as Adapted for a Centrifugal Analyzer	Petter Urdal	911

CASE REPORT

Hyperviscosity Caused by Hyaluronic Acid in Serum in a Case of Wilms' Tumor	Alan H. B. Wu, Owen Stanley Parker, and Lesa Ford	914

Two-Site Monoclonal Antibody Assays for Human Heart- and Brain-Type Creatine Kinase	Antony P. Jackson, Kenneth Siddle, and R.J. Thompson	1157
Theoretical Aspects of One-Point Calibration: Causes and Effects of Some Potential Errors, and Their Dependence on Concentration	G. J. Kemp	1163
Assessment of Analytical Bias: Four New Ways to Use Recovery Measurements	G. J. Kemp	1168
Selenium Concentrations in Plasma of Patients with Arteriographically Defined Coronary Atherosclerosis	Julie Anne Moore, Robert Noiva, and Ibert C. Wells	1171
Ligand Displacement Immunoassay: A Novel Enzyme Immunoassay Demonstrated for Measuring Theophylline in Serum	John A. Hinds, Christopher F. Pincombe, Robin K. Kanowski, Susan A. Day, June C. Sanderson, and Patrick Duffy	1174
Familial Dysalbuminemic Hyperthyroxinemia: A Study of Four Proband and the Kindred of Three	Alfred G. Scottolini, Nadhipuram V. Bhagavan, Thelma Oshiro, and Linda Powers	1179
Two New Methods for Separating and Quantifying Bone and Liver Alkaline Phosphatase Isoenzymes in Plasma	Sidney B. Rosalki and A. Ying Foo	1182
Differential Immunoabsorption Coupled with Rate Nephelometry for Estimation of DNA-Binding Immunoglobulins	Vincent A. DeBari, Joseph Nicotra, James F. Blaney, Edward F. Schultz, and Mark A. Needle	1187
Specific Estimation of 24,25-Dihydroxyvitamin D in Plasma by Gas Chromatography—Mass Spectrometry	Ruth D. Coldwell, David J. H. Trafford, Hugh L. J. Makin, Michael J. Varley, and David N. Kirk	1193
Interlaboratory Comparison of 25-Hydroxyvitamin D Determination	Eberhard Mayer and Heinrich Schmidt-Gayk	1199
Identification and Quantification of Hemoglobins A ₂ and Barts with an Enzyme-Labeled Immunosorbent Assay	Fred A. Garver, Harbans Singh, Hugo Moscoso, Daniel P. Kestler, and Byron S. McGuire, Jr.	1205
Citramalic Acid in Cerebrospinal Fluid of Patients with Bacterial Meningitis	Stanley Perlman and Steven A. Carr	1209

SCIENTIFIC NOTES

- A New Monoclonal-Antibody Two-Site Solid-Phase Immunoradiometric Assay for Human Thyrotropin Evaluated** A. Eugene Pekary and Jerome M. Hershtan 1213
- Electrothermal Atomic Absorption Spectrometric Determination of Aluminum in Serum with a New Technique for Protein Precipitation** Sue Brown, Roger L. Bertholf, Michael R. Wills, and John Savory 1216
- Automated Measurement of Amylase Isoenzymes with 4-Nitrophenylmaltose as Substrate and Use of a Selective Amylase Inhibitor** Hiroaki Okabe, Yoshinori Uji, Keiko Netsu, and Akio Noma 1219
- Multilayer-Film Analysis for Urea Nitrogen in Blood, Serum, or Plasma** Akiyuki Ohkubo, Sachiko Kamei, Manabu Yamanaka, Harumi Katsuyama, Yuzo Iwata, and Nobuyoshi Sekikawa 1222
- Intercomparison of Seven Radioimmunoassay Kits and a Fluorescence Polarization Immunoassay Kit for Digoxin** Katherine A. Erickson and Paul J. Green 1225
- A Commercially Available S-Type Amylase Inhibitor Evaluated for Determination of Amylase Isoenzymes in Serum** Norbert W. Tietz and Denise F. Shuey 1227
- Improved Liquid-Chromatographic Determination of Haloperidol in Plasma** Amiya K. Dhar and Henn Kutt 1228
- A Kit for Citrate in Foodstuffs Adapted for Assay of Serum and Urine** Vijay S. Warty, Ronald P. Busch, and Mohammed A. Virji 1231
- Evaluation of the Amniostat-FLM Assay for Assessment of Fetal Lung Maturity** Gillian Lockitch, Bernd K. Wittmann, Shirley M. Mura, and Louise C. Hawkey 1233
- Liquid-Chromatographic Determination of an Angiotensin Converting Enzyme Inhibitor, CGS 13945, and Its Active Metabolite (CGS 13934) in Plasma** Ashok Rakhit and Vijay Tipnis 1237
- Discordant Inter-Kit Results in the Radioimmunoassay for Choriongonadotropin in Serum** Peter J. Rzasa, Vicente J. Caride, and Edward K. Prokop 1240
- Free and Total Putrescine in Cerebrospinal Fluid Quantified by Reversed-Phase Liquid Chromatography** Richard L. Heideman, Kenneth B. Fickling, and Lynn J. Walker 1243
- Improved Detection of Oligoclonal IgG in Cerebrospinal Fluid by Isoelectric Focusing in Agarose, Double-Antibody Peroxidase Labeling, and Avidin-Biotin Amplification** Tomas Olsson, Vasilios Kostulas, and Hans Link 1246
- Carboxyhemoglobin and Oxygen Affinity of Human Blood** Ermanna Rovida, Michela Niggeler, Stefano Carlone, and Michele Samaja 1250
- Raising Monospecific Antibodies by Use of Protein Components Prestained with Remazol Brilliant Blue and Separated by Disc Electrophoresis on Polyacrylamide Gel** A. M. Saoji, C. Y. Jad, V. L. Yemul, P. M. Khare, and S. S. Kelkar 1252
- A New Endogenous Immunoassay for Prostatic Acid Phosphatase Evaluated** Arthur L. Babson 1254
- Affinity Chromatography Used in Distinguishing Alpha-Fetoprotein in Serum from Patients with Tumors of Hepatic Parenchyma and of Germ Cells** P. K. Buamah, C. Cornell, and A. W. Skillen 1257

LETTERS

- Liquid-Chromatographic Determination of Amiodarone and Its Desethyl Metabolite in Plasma** James R. Shipe 1259
- Two Different Methods for Calculating Stability Compared** P. Schlaepfer and F. Haenni 1259
- Acetylacetone Method for Glycine Improved by Use of Ammonium Citrate Buffer** Scott C. Cole and Steven S. Kuwahara 1260
- A Versatile Recycling System for the COBAS-Bio Cuvette Rotor** John D. Batjer, Lindsay Eades, Raymond J. Liedtke, and Arthur M. Zebelman 1261
- Misunderstandings of Telephoned Blood-Gas Reports** N. Willis and P. Latto 1262
- Total Mg²⁺ Measured in Serum and Urine in the Technicon RA 1000 Random Access Analyzer by Use of Modified Manual Calmagite Procedure** Eleftherios P. Diamandis and Barry R. Hoffman 1262

Heparin Interferes in Creatine Kinase Assays	Liv Theodorsen and Johan H. Strømme	1262
Sodium Azide Interference with a Radiolimmunoassay for Prostatic Acid Phosphatase	R. E. Cobbleddick and I. H. Hinberg	1264
Aspartame Not a Source of Formate Toxicity	Shahram Shahangian, K. Owen Ash, and Douglas E. Rollins	1264
Immunonephelometric Measurement of Apolipoproteins A-I and A-II by Consecutive Addition of the Two Antisera to a Single Specimen	Timo Kuusi, Timo Palosuo, and Christian Ehnholm	1265
Absence of DNA Interference in Measurement of hCG-like Substances in Normal Human Tissues	Glenn D. Braunstein, Judith Seliktar, and Lynne Kelley (Response) Samuel S. Koide	1266
A Case of Crystal Formation in Bone Marrow	Kimbree J. Carter, James D. Jones, Neil S. Mandel, Gretchen S. Mandel, and Alan B. MacDonald	1267
The Cell Nucleus as a Possible Source of Cathodally Migrating Serum Creatine Kinase	E. Jockers-Wretou	1268
LD-6 Isoenzyme and Lactate-Independent Dehydrogenase Differ	Catherine H. Ketchum, C. Andrew Robinson, Jr., Leo M. Hall, and William E. Grizzle (Response) Stanley J. Podlasek, Richard A. McPherson, and Gregory A. Threatte	1269
Serum Tests to Detect Iron Deficiency	B. L. Sheridan and L. C. Pearce	1271
Liquid Chromatography of Plasma Catecholamines, with Electrochemical Detection, after Treatment with Boric Acid Gel	Kazuhiro Maruta, Keisuke Fujita, Shosuke Ito, and Toshiharu Nagatsu	1271
Technicon smac Methods for Uric Acid: Uricase and Phosphotungstate Compared	Martin H. Kroll, Clair Hagengruber, Helen Lindsey, and Ronald J. Elin	1273
Particle-Enhanced Turbidimetric Inhibition Immunoassay of Theophylline Adapted to the Cobas-Bio Centrifugal Analyzer	Raymond J. Liedtke	1274
Tolerable Variations of Imprecision and Inaccuracy	Javier Fuentes	1275
Gas Chromatography—Mass Spectrometry of Maprotiline in Serum	Victor Skrinska, John Ohman, Cheryl Wellstead, and Kurt Hahn	1276
A Cost-Effective Modification of an Immunologic Agglutination Test for Amniotic Fluid Phosphatidylglycerol	Clive R. Hamlin and Patricia A. Sullivan	1277

SEPTEMBER

Sixteenth Annual Symposium on Advanced Analytical Concepts for the Clinical Laboratory

INTRODUCTION	Gerald R. Cooper	1439
ANALYTICAL CONCEPTS		
Highly Sensitive Immunoassays Based on Use of Liposomes without Complement	William J. Litchfield, J. William Freytag, and Marina Adamich	1441
Ultrasound-Accelerated Immunoassay, as Exemplified by Enzyme Immunoassay of Chorionadotropin	Rouhwal Chen, Litai Weng, N. Chung Sizto, Bernardita Osorio, Chen-Jung Hsu, Richard Rodgers, and David J. Litman	1446
Zymogen Activation: A New System for Homogeneous Ligand-Binding Assay	Diane A. Blake, Mark T. Skarstedt, Janice L. Shultz, and Dan P. Wilson	1452
New Separation Method for Monoclonal Immunoradiometric Assays and Its Application to Assays for Thyrotropin and Human Chorionadotropin	S. J. Rattle, D. R. Purnell, P. I. M. Williams, K. Siddle, and G. C. Forrest	1457
Immunogold Staining: Adaptation of a Cell-Labeling System for Analysis of Human Leukocyte Subsets	Jonathan S. Rosenberg, Ethel Weiss, and Peter Wilding	1462
Application of the MAST TM Immunodiagnostic System to the Determination of Allergen-Specific IgE	Steven P. Miller, Vincent A. Marinkovich, David H. Riege, William J. Sell, Dana L. Baker, Noreen T. Eldredge, John W. Dyminski, Robert G. Hale, Joel M. Peisach, and John F. Burd	1467
ANALYTICAL SYSTEMS		
Liquid Chromatography in Open Tubes	Michael P. Maskarinec, Michael J. Sepaniak, Anthony T. Balchunas, and John D. Vargo	1473

n-Electrode Three-Dimensional Liquid Chromatography with Electrochemical Detection for Determination of Neurotransmitters

Wayne R. Matson, Philip Langlais, Ladislav Volicer, Paul H. Gamache, Edward Bird, and Konrad A. Mark

1477

Novel Shell/Core Particles for Automated Turbidimetric Immunoassays

William J. Litchfield, Alan R. Craig, William A. Fray, Charles C. Leflar, Catharine E. Looney, and Michael A. Luddy

1489

POSTER SESSION

Affinity-Column-Mediated Immunoassay Assays: Influence of Affinity-Column Ligand and Valency of Antibody-Enzyme Conjugates

J. W. Freytag, H. P. Lau, and J. J. Wadsley

1494

Elimination of "Hook-Effect" in Two-Site Immunoradiometric Assays by Kinetic Rate Analysis

Kenneth L. Hoffman, George H. Parsons, Lauryl J. Allerd, Jon M. Brooks, and Laughton E. M. Miles

1499

Anti-IgG Binding Test to Assay Circulating IgG-Containing Immune Complexes from Polyethylene Glycol Precipitates

Stanley S. Levinson, Janice O. Goldman, and Carolyn S. Feldkamp

1502

Direct Solid-Phase Enzyme Immunoassay of Progesterone in Saliva

Don F. Tallon, James P. Gosling, Pat M. Buckley, Michael M. Dooley, William F. Cleere, Eamon M. O'Dwyer, and Patrick F. Fottrell

1507

Application of Enzyme Immunoassays to Coagulation Testing

Jean Amiral, Benedicte Adalbert, and Mariette Adam

1512

DIAGNOSTIC AND THERAPEUTIC IMMUNOLOGY

Detection of α_2 -Macroglobulin-Associated Proteases in the Plasma of Patients with Rheumatoid Arthritis

Alexandre Gaspar, John L. Skosey, Winston Sequeira, and Marius Teodorescu

1517

Specificity Considerations in Cooperative Immunoassays

Paul H. Ehrlich and William R. Moyle

1523

Optical Detection of Antibody-Antigen Reactions at a Glass-Liquid Interface

Ranald M. Sutherland, Claus Dähne, John F. Place, and Anthony S. Ringrose

1533

Lymphokines and Monokines as Regulators of Human Lymphoproliferation

Nicola M. Kouttab, Shahikant Mehta, John Morgan, Nizar Tannir, Chintaman Sahasrabudhe, and Abby L. Maizel

1539

ARTICLES

Total Hydrolyzable Glycerol in Amniotic Fluid, and Its Relationship to Fetal Lung Maturity

Lewis Siegel, Suzanne I. Walker, and Noel I. Robin

1546

Quantification of Salicylate in Serum by Use of Salicylate Hydroxylase

Kwan-sa You and John A. Bittikofer

1549

Clinical Effectiveness of the Du Pont *aca* Measurement of Creatine Kinase MB in Serum from Patients in a Coronary-Care Unit

Michael L. Leroux, John Rabson, and Paul R. E. Desjardins

1552

Sulfur Specifically Inhibits Adenylate Kinase in Assays for Creatine Kinase

Percy J. Russell, Joe Conner, and Stephen Sisson

1555

Use of a Rapid, Sensitive Immunoradiometric Assay for Thyrotropin to Distinguish Normal from Hyperthyroid Subjects

William E. Cobb, R. Preston Lamberton, and Ivor M. D. Jackson

1558

Delta Bilirubin in Serum of Pediatric Patients: Correlations with Age and Disease

Elaine M. Brett, Jocelyn M. Hicks, Donald M. Powers, and Royden N. Rand

1561

SCIENTIFIC NOTES

Determination of *p*-Aminobenzoic Acid in Urine by Room-Temperature Phosphorimetry, with Application to the Bentiromide Test for Pancreatic Function

H. Thomas Karnes, Rickey P. Bateh, J. D. Winefordner, and S. G. Schulman

1565

Two Methods Compared for Measuring Lipase Activity in Plasma after Heparin Administration

Christian Ehnholm, Esko A. Nikkilä, and Peter Nilsson-Ehle

1568

Phloroglucinol-Based Colorimetry of Xylose in Plasma and Urine Compared with a Specific Gas-Chromatographic Procedure

Stephen L. Johnson, Marla Bliss, Michael Mayersohn, and Kenneth A. Conrad

1571

A. Adam, J. Boulanger, P. Ers, and M. Parmantier 1720

Better Quality Control of Serum CK-MB Determinations

Ronald H. Ng and Bernard E. Statland 1720

Caffeine Measured in Serum from Infants with the Theophylline Channel of the Abbott TDx

J. David Turnbull, Ruth Meshriy, Jeffrey A. Gere, and Gary Kochalka 1721

A Case of Combined D-Lactate and Renal Tubular Acidosis

A. McNeil and R. N. Walmsley 1722

Clinical Import of Small Increases in Serum Aluminum

John M. H. Howard 1722

Suppliers of Kits for Lutropin, Folitropin, and Prolactin Should All Use the Same Calibrators

A. Albertini, C. Iacobello, G. Pizzocolo, C. Signorini, S. Tosoni, A. Pilo, and G. C. Zucchelli 1723

Colorimetric vs Enzymatic Determination of Serum Phosphorus

A. Adam, J. Boulanger, M. Azzouzi, and P. Ers 1724

Measurement of Iron and Total Iron-Binding Capacity with the RA-1000 Analyzer

Ronald H. Ng, Anne Porter, Marcia Altaffer, and Bernard E. Statland 1725

Christopher S. Frings, Amadeo J. Pesce, Samuel Meites, R. T. Chamberlain, and Jacques Versieck 1727

J. Stanton King 1729

ARTICLES

Two Direct (Nonchromatographic) Assays for 25-Hydroxyvitamin D

Roger Bouillon, Erik Van Herck, Ivo Jans, Biau Keng Tan, Hugo Van Baelen, and Pieter De Moor 1731

Biological Variance of Total Lactate Dehydrogenase and Its Isoenzymes in Human Serum

Godfrey C. Moses and A. Ralph Henderson 1737

Study of a Mechanism Responsible for Anomalous Results for Free Thyroxine by Some Analog Assays for Subjects with Albumin Deficiency

Timothy J. Wilke 1742

An Automated "High-Pressure" Liquid-Chromatographic Assay for Hemoglobin A _{1c}	Graham Ellis, Eleftherios P. Diamandis, Esther E. Giesbrecht, Denis Daneman, and Lynn C. Allen	1746
New Photometric Assay for Chymotrypsin in Stool	P. Kaspar, G. Möller, and A. Wahlefeld	1753
Operational Research and Cost Containment: A General Mathematical Model of a Workstation	Per Winkel	1758
Single-Reagent Polarization Fluoroimmunoassay for Barbiturates in Urine	D. L. Colbert, D. S. Smith, J. Landon, and A. M. Sidki	1765
Determination of Free Thyroxin in Serum by Ultrafiltration: Validation of a Method and Preliminary Results	Nancy Shannon and Paul D. Woolf	1770
Stabilized Analysis of Antidepressant Drugs by Solvent-Recycled Liquid Chromatography: Procedure and Proposed Resolution Mechanisms for Chromatography	Gary L. Lensmeyer and Merle A. Evenson	1774
Determination of Enzyme Activity in Biological Fluids by Means of Electrochemical Oxidation of NADH at a Modified Glassy Carbon Electrode	L. Bartalits, G. Nagy, and E. Pungor	1780
Precipitation of Apo E-Containing Lipoproteins by Precipitation Reagents for Apolipoprotein B	Joyce Corey Gibson, Ardon Rubinstein, and W. Virgil Brown	1784
Measurement of Glucalazide in Plasma by Radial Compression Reversed-Phase Liquid Chromatography	Bruce G. Charles and Peter Ravenscroft	1789
Kinetic Approach for the Enzymic Determination of Creatinine	Nikolaos Perakis and Charles-Michel Woll	1792
Five Methods for Determining Low-Density-Lipoprotein Cholesterol Compared	Pierre N. Demacker, Anneke G. Hijmans, Bernard J. Breninkmeijer, Ad P. Jansen, and Albert van 't Laar	1797

SCIENTIFIC NOTES

Automated Calmagite Compleximetric Measurement of Magnesium in Serum, with Sequential Addition of EDTA to Eliminate Endogenous Interference	Raymond J. Liedtke and Gery Kroon	1801
Creatine Kinase Isoenzymes in Human Cerebrospinal Fluid and Brain	Wayne L. Chandler, Kathleen J. Clayson, W. T. Longstreth, Jr., and James S. Fine	1804
Unreliability of Immunochemical Determination of Lactate Dehydrogenase Isoenzyme-1 in Heparinized Plasma	Gifford Lum	1807
An Automated, Affinity-Column-Mediated, Enzyme-Linked Immunometric Assay for Digoxin on the Du Pont <i>aca</i> ® Discrete Clinical Analyzer	C. C. Leflar, J. W. Freytag, L. M. Powell, J. C. Strahan, J. J. Wadsley, C. A. Tyler, and W. K. Miller	1809
Effects of Sample Preparation on Concentrations of Cyclosporin A Measured in Plasma	Randall W. Yatscoff, David N. Rush, and John R. Jeffery	1812
Combined Immunochemical and Electrophoretic Determinations of Proteins in Paired Serum and Cerebrospinal Fluid Samples	N. M. Papadopoulos, R. Costello, A. D. Kay, N. R. Cutler, and S. I. Rapoport	1814
Improved Assay for Alcohol Dehydrogenase Activity in Serum by Centrifugal Analysis	Shinzo Kato, Hiromasa Ishii, Shojiro Kano, Sachiko Hagihara, Toru Todoroki, Shigeyuki Nagata, Hisao Takahashi, Mari Nagasaka, Jun Sato, and Masaharu Tsuchiya	1817
Automated Kinetic Assay for Lactate Dehydrogenase Isoenzyme 1 by Centrifugal Analysis after Alkaline Inactivation	John H. Eckfeldt, Marcia J. Kershaw, and Linda A. Lewis	1821
Homogeneous Enzyme Immunoassay for Cortisol with a Centrifugal Analyzer	José M. Izquierdo, Aurelia Quirós, Julieta Alvarez-Uria, and Pilar Sotorrio	1824
Effect of Protein Concentration on the Determination of Digoxin in Serum by Fluorescence Polarization Immunoassay	William H. Porter, Virginia M. Haver, and Barbara A. Bush	1826
Performance of the ASTRA Enzyme Systems Evaluated	J. W. Janssen, M. C. J. M. Verdegaa, and R. W. J. Visser	1830
Nephelometry of Acute-Phase Glycoproteins by Binding to Concanavalin A	Eeva Marja Pitkanen, Timo Palosuo, Kimmo Aho, Tuula Putus-Tikkanen, and Robert von Essen	1834
Interference of Endogenous Lactoperoxidase Antibodies in a Solid-Phase Immunosorbent Radioassay for Antibodies to Protein Hormones	Ulla-Britt Ericsson and Ingvar Larsson	1836
Chromatograph with External Column Evaluated for Determining Breath Hydrogen in Clinical Studies	Jorge L. Rosado, Luis Torres, and Noel W. Solomons	1838
Acid-Base-Induced Changes in the Distribution of Water between Plasma and Erythrocytes, as Measured with a Sodium-Ion-Selective Electrode	Niels Fogh-Andersen and Ole Siggaard-Andersen	1843

Inadequate Hemolysis of Erythrocytes on Reagent Strips at Low pH Causes False-Negative Readings	Klas Levin and Iva Engström	1845
Enzyme Immunoassay for Pregnancy-Associated Plasma Protein-A	D. J. MacDonald, H. C. Mehta, D. S. Mack, T. Duffy, and A. C. A. Glen	1848
A New Technique for Studying the Relationship between Maternal Diabetes and the Sialic Acid Content of Fetal Pulmonary Surfactant	Thomas Delahunty	1851
An Evaluation of Kits for Measuring Thyrotropin in Newborns	Elizabeth A. Pierson, Bradford L. Therrell, Jr., Sandra F. Franz, Alice J. Rudenstein, and Patricia E. Dziuk	1854
Standardized Automated Assay for Functional α_1 -Antitrypsin	Richard E. Mullins, Robert L. Miller, Robert L. Hunter, and Beth Bennett	1857
Reactivation of Serum Creatine Kinase Isoenzyme BB in Patients with Malignancies	Lenox B. Abbott and John A. Lott	1861
The Distribution of Chymotrypsin within the Feces and Description of a New Device for the Preparation of Stool Samples	P. Kaspar and U. Neumann	1864
Abbott Radiative Energy Attenuation Method for Quantifying Ethanol Evaluated and Compared with Gas-Liquid Chromatography and the Du Pont <i>aca</i>	Paul L. Cary, Paul D. Whitter, and Charles A. Johnson	1867
Particle-Enhanced Turbidimetric Inhibition Immunoassay for Theophylline Evaluated with the Du Pont <i>aca</i>	Kent E. Opheim, Melvin R. Glick, Ching-Nan Ou, Kenneth W. Ryder, Lydia Chen Hood, Vernon Ainardi, Laura A. Collymore, Wilsa DeArmas, Vicki L. Frawley, Juliene Hutchinson, Sheila A. Jackson, Jan L. Trent, Donna K. Taylor, John C. Baenziger, and Tijen O. Oei	1870
Lactate Production by Aerobic Bacteria Grown in Cerebrospinal Fluid	Frederick L. Kiechle, Mary A. Kamela, and Robert W. Starnes	1875

LETTERS

Condensation of Isoniazid and Acetaldehyde	H. G. Giles, S. Meggiorini, and L. D. Colebrook	1877
Improved Dye-Binding Procedure for Determining Microgram Quantities of Protein in Cerebrospinal Fluid—Once Again	Marta Stahl	1878
Affinity Chromatography of Urinary Brush-Border Enzymes on Concanavalin-Sepharose	Klaus Jung and Monika Pergande	1878
Serum Procollagen-III as Indicator of Therapeutic Effect in Children Treated for Somatotropin Deficiency	Göran Lindstedt, Lena Weijkum, Per-Arne Lundberg, and Kerstin Albertsson-Wikland	1879
Thyroid-Function Tests: A Comment	C. Sanderson	1881
Pitfall in the Use of Commercial Kits for Evaluating Pregnancy-Specific β_1 -Glycoprotein (SP1)	C. Decoster and G. Vassart	1881
More on "Flipped" Lactate Dehydrogenase Patterns in Myocardial Infarction	David E. Bruns, John Savory, and Michael R. Willis	1881
Activated Polyamide Tubes for Radioimmunoassay	Ken Outch, Robert MacLean, Ausma Mirovics, and Peter Dennis	1882
Ammonia Results Increased by Bacteria in <i>aca</i> Needle Tubing	Lyle W. Hayes and J. Robert Swanson	1882
Pyruvate Interference in RA 1000 Single-Reagent AST Method	A. P. van Zanten and K. A. Verbeek	1883
More on Drug Assay Interferences	Loyd V. Allen, Jr.	1884
Negative Interference with the Ektachem (Kodak) Enzymic Assay for Creatinine by High Serum Glucose	Stephen Gerard and Hassan Khayam-Bashi	1884
In Acetaminophen Assay, Only Unconjugated Drug Should Be Measured	William H. Porter	1884
(More) M. J. Stewart, A. M. Chambers, and I. D. Watson		
(Response) Robert C. Elser and Pearl E. Novotny		
Colorimetric Calibration of Multichannel Pipettes	David Kaufman and Gary H. Wobig	1885
Bichromatic Blanking in the Bromocresol Purple Method for Albumin in Serum and Plasma	Gerald A. Maguire	1886
Concentrations of Transthyretin (Prealbumin) and Retinol-Binding Protein in Alcoholics during Alcohol Withdrawal	Michael J. Staley, Daya Naidoo, and Saxby A. Pridmore	1887

"Interferovalue" Indicates the Interference of Substances with Creatinine Determination	Takanori Okuda, Jyun'ichi Ito, and Masafumi Nishida	1888
Optimizing a Liquid Chromatographic Mobile Phase for Simultaneous Analysis of Eight Antiepileptic Drugs	Toshihiro Tsuneyoshi, Akira Kawamoto, and Junji Koezuka	1889
Changes in α -Fetoprotein Concentrations during Storage at 73 °C	Knud J. Helsing, George W. Comstock, H. Lorrin Lau, and S. Linkins	1890
Enzyme Activities and Hypothyroidism	L. V. K. de Silva	1890
Urinary Oxalate by Rate Analysis Compared with Gas-Chromatographic and Centrifugal Analyzer Methods	A. H. Chalmers and D. M. Cowley	1891
Astra Creatinine Reagent Stable	John W. Koenig	1892
BOOK REVIEWS	Irving Sunshine, Roberta G. Reed, Samuel Natelson, and Thomas R. Koch	1893
THE CLINICAL CHEMIST	J. Stanton King	1895

Two-Dimensional Electrophoresis Protein Mapping

PREFACE	J. Stanton King	1897
EDITORIAL		
Some Perspectives on Two-Dimensional Protein Mapping	Leigh Anderson and Norman Anderson	1898
ARTICLES		
Two-Dimensional Electrophoresis of Proteins from Cultured Human Retinal-Pigment Epithelial Cells: Internal References, Cataloging, and Glycoproteins	James E. Haley and Peter Gouras	1906
Tissue Proteins in Breast Cancer, as Studied by Use of Two-Dimensional Electrophoresis	J. Stastny, R. Prasad, and E. Fosslien	1914
Quantitative Analysis and Pattern Recognition of Two-Dimensional Electrophoresis Gels	Gregg Ridder, Ed VonBargen, David Burgard, Harvey Pickrum, and Emma Williams	1919
Identification of Polypeptides on Two-Dimensional Electrophoresis Gels by Amino Acid Composition	Gerald I. Latter, Stephen Burbeck, James Fleming, and John Leavitt	1925
Two-Dimensional Electrophoresis and "Ultrasensitive" Silver Staining of Cerebrospinal Fluid Proteins in Neurological Diseases	Michael G. Harrington and Carl R. Merril	1933
"Ultrasensitive" Silver Stains: Their Use Exemplified in the Study of Normal Human Cerebrospinal Fluid Proteins Separated by Two-Dimensional Electrophoresis	Carl R. Merril and Michael G. Harrington	1938
A Metrological Study of Autoradiographs from Two-Dimensional Gel Electrophoresis	Odile Valiron, Ivan Lefkovits, Philippe Garderet, and Charles Steinberg	1943
Two-Dimensional Electrophoretic Analysis of Cytosols from Human Breast Tumors: Optimal Migration Conditions	Philippe Motté, Jean-Michel Bidart, Jean-Claude Delarue, Etienne Comoy, Philippe Moingeon, and Claude Bohuon	1947
An Approach to Molecular Analysis of T-Cell Clones by Two-Dimensional Gel Electrophoresis: Is There Interclonal and Intracolonial Heterogeneity?	J. Kettman and I. Lefkovits	1950
Protein-Pattern Changes and Morphological Effects Due to Methionine Starvation or Treatment with 5-Azacytidine of the Phorbol-Ester-Sensitive Cell Lines HL-60, CCL-119, and U-937	N. Leigh Anderson and M. Anne Gemmell	1956
Identification of Coordinate Pairs of Polypeptides: A Technique for Screening of Putative Precursor Product Pairs in 2D Gels	Peter F. Lemkin, Peter Sonderegger, and Lewis E. Lipkin	1965
Quality Control and Technical Outcome of ISO-DALT Two-Dimensional Electrophoresis in a Clinical Laboratory Setting	Judith A. Daufeldt and Harold H. Harrison	1972
Improved Record Keeping and Photography of Silver-Stained Two-Dimensional Electrophoretograms by Way of "XRD Images"	Harold H. Harrison	1981

Spot Identification in Two-Dimensional Patterns by a Least-Squares Template Matching	I. Pardowitz, H.G. Zimmer, and V. Neuhoff	1985
Proteins in Normal, Irradiated, and Postmortem Human Brain Quantitatively Compared by Using Two-Dimensional Gel Electrophoresis	Raj K. Narayan, William E. Heydorn, G. Joseph Creed, Paul L. Kornblith, and David M. Jacobowitz	1989
Two-Dimensional Gel Electrophoresis Used in Neurobiological Studies of Proteins in Discrete Areas of the Rat Brain	David M. Jacobowitz and William E. Heydorn	1996
Effect of Heat and Sodium Dodecyl Sulfate on Solubilization of Proteins before Two-Dimensional Polyacrylamide Gel Electrophoresis	Steven C. Hodges and Arthur A. Hirata	2003
Two-Dimensional Electrophoresis of Proteins in Human Serum: Improved Resolution by Use of Narrow pH Gradients and Prolonged Electrophoresis	Thomas Marshall, Katherine M. Williams, and Olof Vesterberg	2008
An Attempt to Resolve All the Various Proteins in a Single Human Cell Type by Two-Dimensional Electrophoresis: I. Extraction of All Cell Proteins	J. Klose and E. Zeindl	2014
Gamma Heavy Chain Disease Studied by Two-Dimensional Electrophoresis and Immuno-Blotting Techniques	Pascale Blangarin, P. Deviller, K. Kindbeiter, and J.J. Madjar	2021
Systematic Characterization of Human Prostatic Fluid Proteins with Two-Dimensional Electrophoresis	Yvonne C. Tsai, Harold H. Harrison, Chung Lee, Judith A. Daufeldt, Lyda Oliver, and John T. Grayhack	2026
Global Approaches to Quantitative Analysis of Gene-Expression Patterns Observed by Use of Two-Dimensional Gel Electrophoresis	N. Leigh Anderson, Jean-Paul Hofmann, Anne Gemmell, and John Taylor	2031
Computerized Comparison of Two Autoradiographs	William R. Hruschka	2037
"Map" of Proteins Resolved from Human Chorionic Villi by Two-Dimensional Electrophoresis	Petronella L. Trnka, Eugene Pergament, and Norman G. Anderson	2040
Two-Dimensional Gel Pattern of Proteins Synthesized <i>de Novo</i> in Lymphoid Organs of the Mouse	Gerd Pluschke and Ivan Lefkovits	2043
Two-Dimensional Electrophoresis Used to Differentiate the Causal Agents of American Tegumentary Leishmaniasis	Nancy G. Saravia, M. Anne Gemmell, Sharon L. Nance, and N. Leigh Anderson	2048
Changes in the Expression of Hepatocyte Protein Gene-Products Associated with Adaptation of Cells to Primary Culture	Robert A. Colbert, John M. Amatruda, and Donald A. Young	2053
A "High-Performance" 2D Gel Scanner	H. Kronberg, H.-G. Zimmer, and V. Neuhoff	2059
Myosin Light Chain Phosphorylation and Tension Development in Stretch-Activated Arterial Smooth Muscle	Ronald F. Ledvora, Michael Bárány, and Kate Bárány	2063
Leukocyte Membrane Proteins in Chronic Lymphocytic Leukemia, as Studied by Two-Dimensional Gel Electrophoresis	Karen E. Willard-Gallo, Yves Humblet, and Michel Symann	2069
Protein Changes in Activated Human Platelets	Carol S. Giometti and Norman G. Anderson	2078
Two-Dimensional Electrophoresis of Human Plasma Apolipoproteins	Dennis L. Sprecher, Lila Taam, and H. Bryan Brewer, Jr.	2084
Molecular Characterization of an Abnormal Fibrinogen by Two-Dimensional Electrophoresis	B. Polack, O. Valiron, E. Concord, J. M. Freyssinet, and G. Hudry-Clergeon	2093
Pouring Reproducible Gradients in Gels under Computer Control: New Devices for Simultaneous Delivery of Two Independent Gradients, for More Flexible Slope and pH Range of Immobilized pH Gradients	Klaus Altland and Alexander Altland	2098
Advantages of Separations on "Giant" Two-Dimensional Gels for Detection of Physiologically Relevant Changes in the Expression of Protein-Gene Products	Donald A. Young	2104
